PROFILE

Informatics Engineering student at UIN Syarif Hidayatullah Jakarta with a strong interest in Machine Learning and Artificial Intelligence. Experienced in developing machine learning and deep learning projects through academic and technology learning programs. Familiar with Python, data analysis, model development, evaluation, and AI application development. Strong academic background with a 3.96 GPA and experience working collaboratively in technical teams.

EDUCATION

UIN Syarif Hidayatullah Jakarta 2025 - present

Bachelor of Informatics Engineering
GPA: 3.96

PROJECT & EXPERIENCE

Diagnostic Liver Disease Prediction Feb - Apr 2026

- Built a liver disease prediction model using LFT data.
- Selected XGBoost, achieving 0.76 ROC-AUC and 0.70 Accuracy.
- Integrated the model into a Streamlit web application with an 8-member team.

Customer Churn Prediction Jan 2026

- Built a customer churn prediction model using behavioral and subscription data.
- Selected Random Forest, achieving 0.81 ROC-AUC.
- Developed a Streamlit dashboard for churn prediction.

House Price Prediction Oct–Dec 2025

- Developed a house price prediction model using property and location data.
- Compared multiple regression algorithms and selected XGBoost.
- Achieved an R^2 score of 0.87 and deployed the model with Streamlit.

SKILLS

- Python
- Machine Learning
- Deep Learning
- TensorFlow
- PyTorch
- Scikit-Learn
- Pandas
- NumPy
- XGBoost
- Streamlit
- Git
- Figma
- Adobe Photoshop
- CorelDRAW

CERTIFICATIONS

ASAH 2026

AI and technology learning program by Dicoding.

Coding Camp 2026

Technology learning program powered by DBS Foundation and Dicoding.

Pijak in Collaboration with IBM SkillsBuild

AI learning program covering Python, Machine Learning, and Deep Learning.

AI Minicamp 2026

Practical AI learning program by Dicoding.

BDT 2026

AI productivity training program by Dicoding and Kementerian Ekonomi Kreatif.
